CENTA GROUP ACCREDITATIONS

DETECTION & GAS SYSTEMS

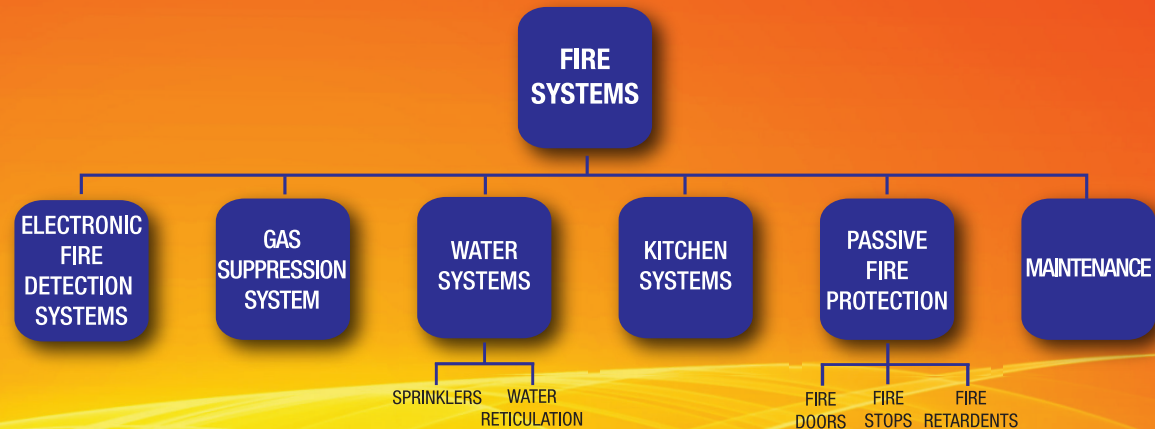

CENTA GROUP
 COMPLETE FIRE PROTECTION

DETECTION & GAS SYSTEMS

OVERVIEW

Centa is an ISO 9001 listed company. Our team of experienced SAQCC D&GS registered Technicians can assist in providing systems specific to any environment, from design layout, installation to maintenance.

ELECTRONIC FIRE DETECTION

Early warning smoke detection solution.

PRODUCT:

Vesda, Addressable and Conventional Systems
Linear, Beam Detectors

SUITED TO:

Private and public buildings, industrial sector.

GAS SUPPRESSION SYSTEM

Automatic fire extinguishing systems control and extinguish fires without human intervention.

PRODUCT:

FM200, HFC's, Pyroshield, CO2, Inergen, Novac

SUITED TO:

Public and private buildings, computer rooms, industrial sector.

WATER SYSTEMS

An automatic fire protection measure, consisting of a water supply system which applies water to a fire extinguishing the fire using a "cooling method".

PRODUCT:

Water reticulation, water mist system, sprinklers

SUITED TO:

Commercial and industrial buildings, parking arcades.

PASSIVE FIRE PROTECTION

Provides structural fire protection and fire safety in a building. Contains a fire from spreading from point of ignition.

PRODUCT:

Fire doors, fire retardents, fire stops

SUITED TO:

Any building or structure.

KITCHEN SYSTEM

An automatic fusible link fire detection and fully-mechanical suppression system designed specifically to meet the needs of kitchen areas typically found in hotels, restaurants and public institutions.

SEE OUR SEPARATE KITCHEN SYSTEM BROCHURE

MAINTENANCE

Centa Technicians are all trained and registered with SAQCC D&GS.

SERVICE INCLUDES:

Maintenance of all fire systems
Room Integrity Testing
